LETTER FROM THE ORGANIZATION

LETTER FROM THE ORGANIZATION

The purpose of this letter is to inform you about the celebration of the 2nd International Tailoring Congress, a distinguished initiative organized by the Spanish Tailoring Association (AES).

Founded in March 2017, our non-profit association has the fundamental goal of promoting and projecting Spanish tailoring and shirtmaking, both nationally and internationally.

We work to preserve the unique standards of our sartorial culture by developing training programs, awareness initiatives, and content creation efforts that ensure the continuous renewal of professionals.

In a sector where tradition coexists with innovation, the Spanish Tailoring Association (AES) positions itself as the benchmark organization for preserving, promoting, and dignifying the tailoring profession in Spain, representing both artisanal workshops and companies offering high-quality industrial tailoring.

Today, AES brings together a broad spectrum of professionals in the field: from prestigious fabric manufacturers and traditional artisanal tailoring houses to companies specializing in industrial tailoring that have incorporated cutting-edge technology to produce garments with high standards of precision and quality.

In this way, AES has consolidated itself as an inclusive, rigorous, and respectful space for the sector's diversity, contributing to elevating the overall standard of tailoring in Spain.

This 2nd International Tailoring Congress not only seeks to highlight the value of tailoring and shirtmaking as crafts with strong historical and human components, but also aims to strengthen ties among professionals in the field globally. During this event, attendees will enjoy the rich heritage of tailoring and share a weekend full of activities that celebrate this fascinating profession.
